Capacity Building for Research Group: Application of Molecular Biology & Bioanalysis Methods in Research & its Didactic Approach for Online Teaching

SPEAKERS

Wednesday, July 8th 2020
07.30 - 11.00 CEST
12.30 - 16.00 WIB

Prof. Dr. Antje Labes
(FUAS - Germany)

"Molecular Methods & Bio-analysis
Introduction to the Field and
Didactic Approach for Bachelor and
Master's Level"

Thursday, July 9th 2020
08.00 - 11.00 CEST
13.00 - 16.00 WIB

Dipl.-Biochem. Holger Rehmann
(FUAS - Germany)

"Bioanalytic as an Online Course
and its application on
Corona Detection Assays"

Prof. DAFIK, M.Sc., Ph.D.
(UNEJ - Indonesia)

"Research Based Learning in Improving
Creative Innovative Students
Thinking Skill for New Normal Era"

Dipl.-Ing. Marlies Witte M.Sc.
(FUAS - Germany)

"Corona Best Practice
Laboratory"

MODERATOR

Dr. rer. nat. Kartika Senjarini

CREATIVE-INNOVATIVE: THE 21st CENTURY SKILL INDICATORS

THE TWO-DIMENSIONAL ARITHMETIC SEQUENCE

H-COVERING AND CRYPTOSYSTEM

Let a be an initial value, and d be a difference. The Arithmetic sequence can be written as follows:

$$\begin{array}{ccccccccc} U_1, & U_2, & U_3, & U_4, & \dots, & U_n \\ a, & a+d, & a+2d, & a+3d, & \dots, & a + (n - 1)d \end{array}$$

The i -term of arithmetic sequence is $U_n = a + (n - 1)d$. **The two dimensional Arithmetic sequence** is the sequence consists of m, n elements.

TWO-DIMENSIONAL ARITHMETIC SEQUENCE: THE SIMPLE CONCEPT

$$\begin{aligned} \dots U_n &= a + (n - 1)d \\ &= 1 + (i - 1)n \end{aligned}$$

$$\begin{aligned} \dots U_m &= a + (m - 1)d \\ &= 1 + (j - 1)n \end{aligned}$$

$$P_{m,d}^n(i, j) = (j - 1)n + i$$

TWO-DIMENSIONAL ARITHMETIC SEQUENCE: THE APPLICATIONS

The result of
super H-antimagic
total graph on
 $G = Shack(C_6, v, 4)$

$G = Shack(C_6, v, 4)$

ENCRYPTION

$$y_i = (x_i + k_i) \pmod{26}$$

DECRYPTION

$$x_i = (y_i - k_i) \pmod{26}$$

Affine
Chiper

Cryptosystem is a system which converts plain text to cipher text or cipher text to plain text by the application of **encryption** or **decryption** algorithm.

The strength of cryptosystem relays on the management of ***encryption key***.

The key should be managed such that it is hard for any intruder to analyze the key.

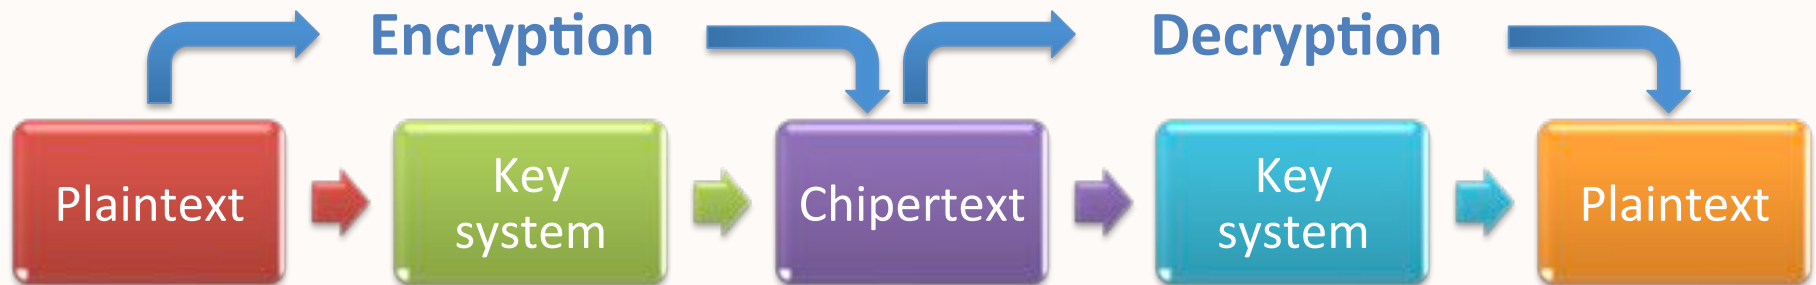

The main issue is how to develop a secure modern cryptosystem such that the key between plaintext and ciphertext is hidden.

Encryption

- the process of transforming information so it is unintelligible to anyone but the intended recipient

Decryption

- the process of transforming encrypted information so that it is intelligible again

TWO-DIMENSIONAL ARITHMETIC SEQUENCE: THE APPLICATIONS

The result of encryption process
which super H-antimagic total
graph on $G=Shack(C_{\theta}, v, 4)$
as keystream

Plaintext	x_i	k_i	x_i+k_i	y_i	Chipertext
F	5	1	6	6	G
K	10	2	12	12	M
I	8	9	17	17	R
P	15	12	27	1	B
U	20	14	34	8	I
N	13	15	28	2	C
E	4	3	7	7	H
J	9	8	17	17	R

The result of decryption process
which super H-antimagic total
graph on $G=Shack(C_{\theta}, v, 4)$
as keystream

Chipertext	y_i	k_i	y_i-k_i	x_i	Plaintext
G	6	1	5	5	F
M	12	2	10	10	K
R	17	9	8	8	I
B	1	12	15	15	P
I	8	14	20	20	U
C	2	15	13	13	N
H	7	3	4	4	E
R	17	8	9	9	J

TWO-DIMENSIONAL ARITHMETIC SEQUENCE: THE COMBINATORIAL PROBLEMS

Combinatorics is an area of mathematics primarily concerned with counting, both as a means and an end in obtaining results, and characterizing a property of finite structures

The well-known founding fathers of combinatorial problems were Pascal (1623-1662), Jacob Bernoulli (1654-1705) and Leonhard Euler (1707-1783)

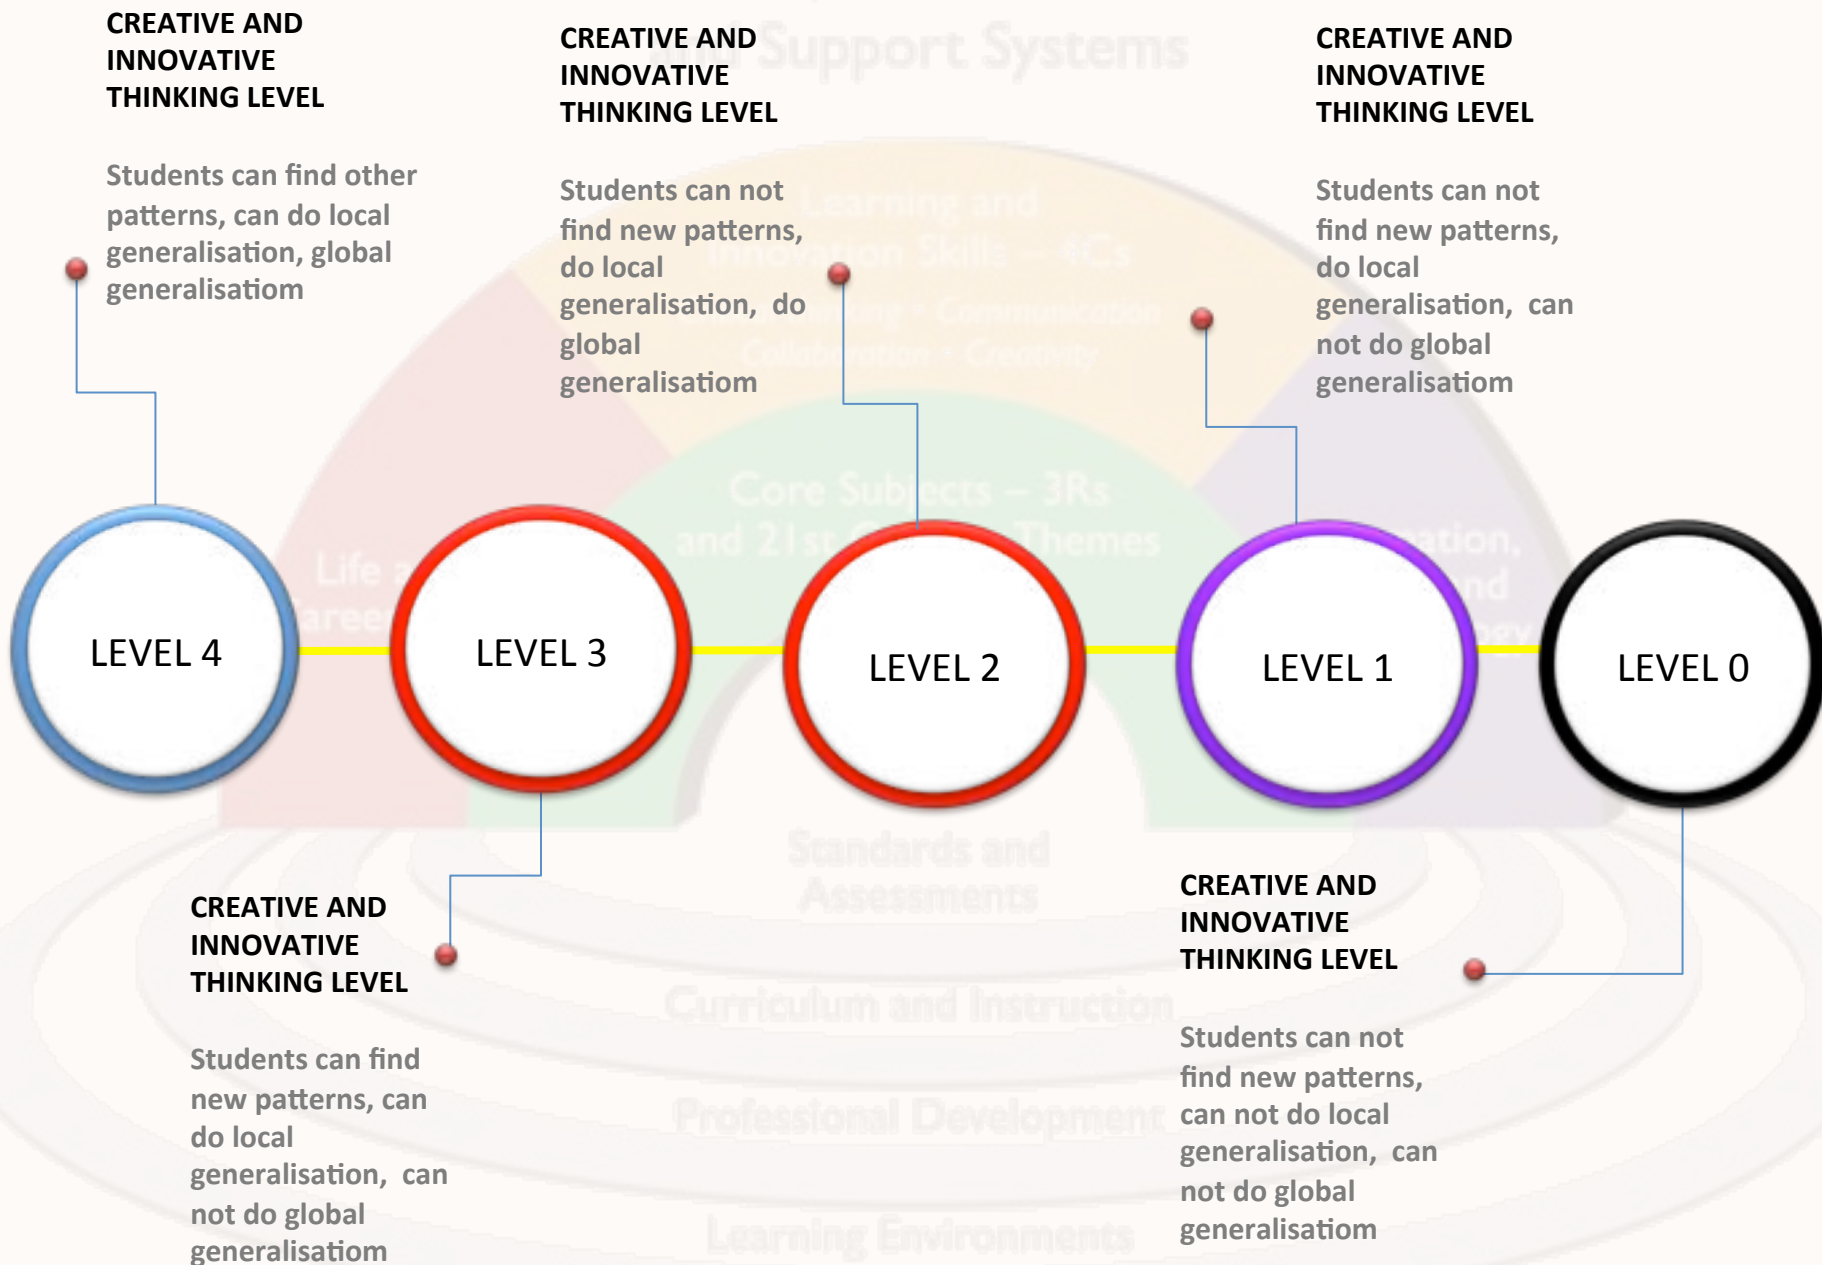

Combinatorial Problems

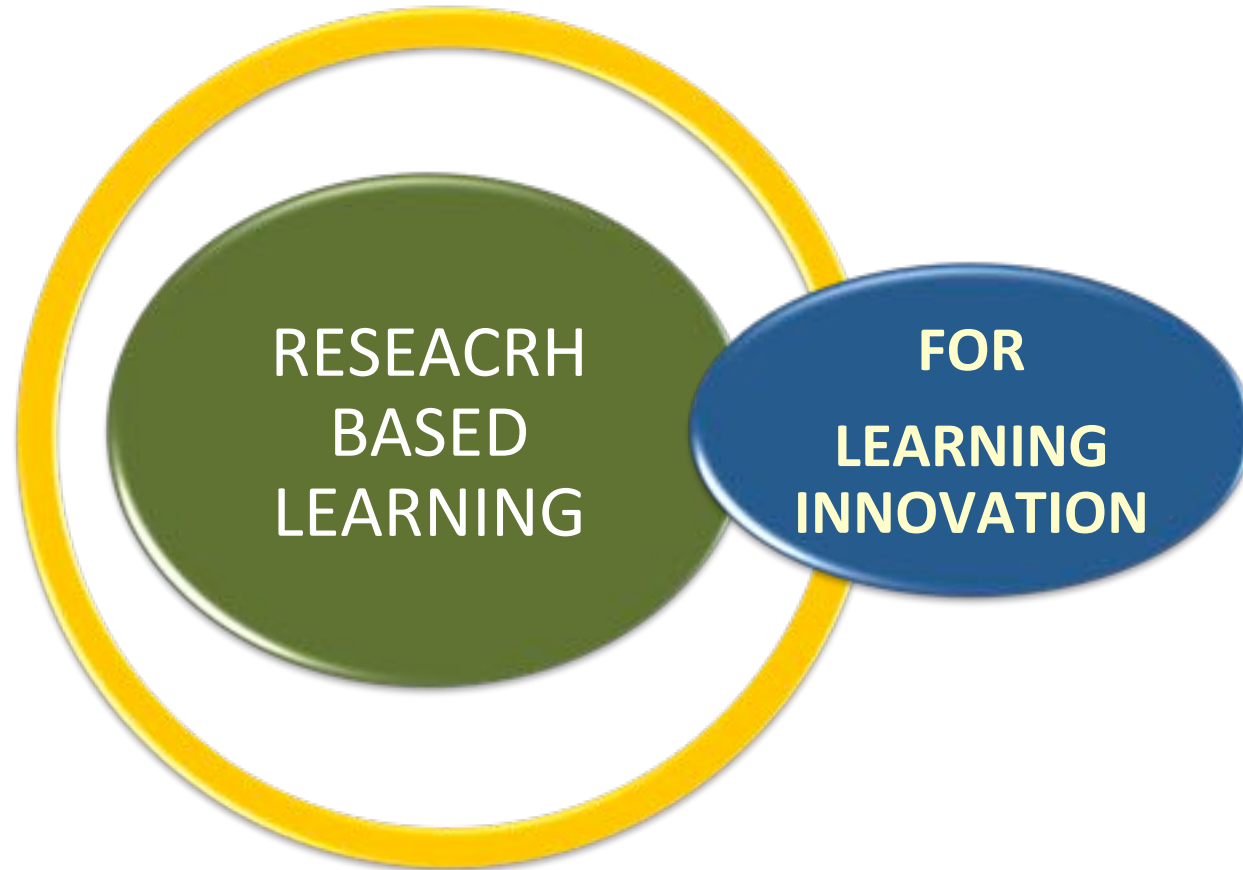

- Does the solution exist?
- How unique are they?
- How optimum are they?
- Can we generalize it?
- Can we prove it?

IS

DEFINITION OF RESEARCH GROUP

RESEARCH GROUP is a group of researchers who work on teaching, researching and supervising on specific research of interest to solve a fundamental problem from a simple to complex, from invention, innovation and diffusion to pursue a real-life applications, journal publications, books, patents, prototype for, and copyrights containing a high novelty results.

THE EXISTENCE OF RG

1. Research Group can be in departmental level
2. Research Group can be in faculty level
3. Research Group can be in university level

For National or international level, we name as a research society

LEVEL OF RESEARCH GROUP

RESEARCH BASED LEARNING: THE SYNTAX OF LEARNING PROCESS IMPLEMENTATION

RESEARCH-BASED LEARNING: THE DEFINITION

RESEARCH BASED LEARNING IS A TYPE OF SCL MODELS THAT BRINGS THE RESEARCH ELEMENTS INTO THE LEARNING PROCESS (*BLACKMORE, P. AND FRASER, M. 2010*)

Research based learning is a constructivism based learning involving four aspects: Problem posing regarding on the research open problems, conceptual orientation respecting to the problems, collaboration in collecting and analyzing data regarding to the problem solving, communicating the research result both oral or writing.

Luanganggoon, Nuchwana, 2012 stated that RBL can improve 5 students skills, namely: 1) Cognitive, 2) Knowledge, 3) Ethics Skill, 4) Social skill and 5) Communication, Arithmetic, Information and Technology skill.

THE INTEGRATION OF RESEARCH INTO LEARNING PROCESS (HEALEY, 2013)

More Students Involvements

Research-Tutored

Learning process are enriched by research results, journal paper review, journal proceeding, or book chapter from RG. Students are encouraged to review them

Research-Based

Learning process actively involves students to do research in solving a problem arising from RG open problems
